(54) Title: A METHOD AND A DEVICE FOR LIFTING AND/OR LOWERING OF OBJECTS AT A WIND TURBINE OR THE LIKE AND USES HEREOF

(57) Abstract: Method and device for lifting and/or lowering of objects in connection with a wind turbine or similar construction, where an uplift device is made to lift and/or lower itself in the proximity of the wind turbine or the similar construction, in as much as uplift device is possibly controlled in relation to the wind turbine or the similar construction and where at least one object is supported by said uplift device. The invention further relates to use hereof for lifting and/or lowering of various parts in connection with a wind turbine.
